*Thank you for choosing **G14 Surgical Supply**. With over 18 years of experience within the instrument marketplace and decades of first-hand experience with the creation, design and manufacturing of innovative plastic surgery instrumentation, **G14 Surgical Supply** understands that you need to rely upon your instruments to perform exactly as you intend – day after day after day. We also understand that you need a responsive instrument resource.*

As part of our ongoing mission, we are committed to continually introducing you to new and innovative surgical instruments and equipment. It is with pride that we enclose our offering of the finest line of plastic and reconstructive surgical instruments. Developed with the inspiration from some of the most respected names in the plastic surgery community, these instruments serve to better enhance your surgical outcomes with the ultimate purpose of providing better care for your patients.

We are proud to expand our Plastic Surgery line of rasps complete with our patented blend of tungsten carbide inserts possessing an extremely hardened cutting surface. We've also added to our electrosurgical line with our new non-stick bipolar forceps. Our proprietary Onyx™ line, with finely fused tungsten carbide Micro Onyx™ jaws, now guarantee you a new level of sharpness and dependability. And our expanded line of SuperCut scissors enables you to combine the right cutting edge with the right handle comfort.

***G14 Surgical Supply** is far more than just instruments. Our passion for quality and our fervor for service have been recognized by surgeons around the world. We are honored for the confidence you have bestowed upon us as we diligently work to make a difference.*

We thank you for your trust in our products.

CEO,
Rehan Jahir

Nasal blade

These instruments are used for maxillary advancement in Le Fort I, II, or III procedures. A large curvature of the blade prevents damage of the teeth. The oral blades are asymmetrical to adapt to the curvature of the palate which is often high and concave.

LIPOSUCTION

MERCEDES with 2 PORTS

This circumferential two port configuration cell friendly liposuction cannula is effective for multi-plane soft tissue harvesting

G14-12436 3mmx32cm

MERCEDES with 3 PORTS

This circumferential three port configuration cell friendly liposuction cannula is effective for multi-plane soft tissue harvesting

G14-12439 2mmx18cm
G14-12440 3mmx18cm
G14-12441 4mmx18cm
G14-12442 3mmx30cm
G14-12443 4mmx30cm
G14-12489 2mmx32cm
G14-12467 5mmx32cm

PYRAMID

This commonly used design has three ports located 180 degrees from the thumb print. It is a slightly more aggressive cannula than the Standard during liposuction procedures

G14-12444 2mmx20cm
G14-12445 3mmx20cm
G14-12446 4mmx20cm
G14-12468 4mmx32cm
G14-12469 5mmx32cm

STANDARD

This is the most common cell friendly cannula design for soft tissue removal. The single port is located 180 degrees from the thumb rest on the hub

G14-12447 2.4mmx20cm
G14-12448 3.0mmx20cm
G14-12470 3.7mmx20cm
G14-12471 4mmx32cm
G14-12472 5mmx32cm
G14-12473 3mmx32cm

FLAP

The Flap is primarily used as an undermining dissector, and in smaller diameters, for facial tissue removal. The Flap Cannula in a 2.1mm diameter is very useful for undermining the nasolabial fold prior to autologous tissue injections, as well as for tissue removal

G14-12494 2.1mmx 9cm
G14-12449 2.4mmx20cm
G14-12450 3.0mmx20cm
G14-12451 3.0mmx30cm
G14-12452 4.0mmx30cm

V-DISSECTOR

This cannula is specifically designed for use in the superficial compartment of the truncal area. The cutting notch is very useful for undermining in facial procedures and in dense, fibrous tissue in this anatomic area

G14-12453	1.6mmx8.5cm
G14-12454	2.4mmx18cm

BASKET CANNULA

It can operate as an equalizer without vacuum to treat adipose tissue and skin irregularities in revision liposuction and fat transfer procedures.

The Basket Cannula is also adept under vacuum as a fat harvesting cannula. For finishing, this cannula can be used as an injector for equalizing and adding adipose tissue to sculpt smoother contours

G14-12455	3mmx30cm
G14-12456	4mmx30cm

CANNULA & SYRINGES FOR INFILTRATION
